Mindset^{of the} Empowered Woman™

This course will not only educate and empower you, but *it might just save your life.*

Born in 2012 as *Elements of the Defensive Mindset™*, this life-changing seminar has already empowered over 20,000 women and safety-conscious individuals across more than 25 states, including law enforcement officers, civic leaders, women's organizations, and sororities nationwide.

Now reimagined as *The Mindset of the Empowered Woman™*, this exclusive women-only experience is designed to shatter the dangerous myth that violence is random or unavoidable. Instead, it puts you in control, arming you with the awareness, confidence, and strategies to recognize threats before they become attacks. The truth is simple: the threat of violence is real, and it's everywhere. But so is your ability to foresee it and prevent it if you know how.

Don't wait to become a statistic. Step into your power. Own your safety. Claim your strength.

Secure your spot today, and discover the confidence that changes everything!

"Had I been able to recognize the warning signs that, in retrospect, were pretty clear knowing what I know now, my attack may well have never taken place."

Tracey Marazzi; stabbed three times with a butcher's knife while lying in her bed in a December 2012 targeted home invasion by a neighbor/stalker in her Ft. Myers, FL gated community.
